DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, line 5, the composition ratio of In is not clear. Is this a ratio of number of atoms? For example, if the material were to be InGaAs, would the ratio of concern here be the number of atoms of In to the number of atoms of Ga + As? Or would it be the number of atoms of In to the number of atoms of Ga? Other claims with the term "composition ratio" are similarly unclear. With respect to claim 5, what is the gradient da/dz ? The gradient of what? (What is the antecedent?) Other claims with this gradient are similarly unclear. With respect to claim 6, the reference to a method in claim 1 is not clear. Claim 1 does not appear to recite a method. With respect to claim 6, what is the oscillation wavelength? What is it that is oscillating? Other claims with this term are similarly unclear.
